### Questions:

1. What kind of trend do you see? Is it increasing, decreasing or fluctuating?

The trend is steadily increasing over time which shows growth in sales.

2. Do you notice any spikes or drops?

There are minor fluctuations, but not any major spikes or drops. The increase is gradual.

3. What might have caused them.

The reason might be due to seasonal variations, marketing conditions or any holidays.

4. If this data continues, what do you think the next few days might look like?

If the data continues, the sales are expected to grow steadily.

### Observations:

1. Identify any trends (increasing, stable)

The data shows increasing trend over time, indicating a consistently rise.

2. Discuss if any patterns, such as fall or rise on specific days are noticeable.

There are no specific days with significant rise or falls in the dataset monthly. The sales shows steady and gradual growth.
